\$500 to \$749	629	212	18.6%	5.9%	20.5
\$750 to \$999	963	222	28.4%	5.8%	14.0
\$1,000 to \$1,499	1,261	250	37.2%	6.3%	12.0
\$1,500 or more	45	293	1.3%	8.6%	395.6
No rent paid	124	233	(X)	(X)	114.3

# 2005-2009 American Community Survey

## Demographic Profile

Osborn, Skillman Good Neighborhood	Estimate	Margin of Error	Percent	Margin of Error	CV
<b>GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)</b>					
<b>Occupied units paying rent (excluding units where GRAPI cannot be computed)</b>	<b>3,230</b>	<b>351</b>	<b>3,230</b>	<b>(X)</b>	<b>6.6</b>
Less than 15.0 percent	217	184	6.7%	5.7%	51.7
15.0 to 19.9 percent	166	265	5.1%	8.2%	97.1
20.0 to 24.9 percent	224	218	6.9%	6.7%	59.2
25.0 to 29.9 percent	211	180	6.5%	5.5%	51.8
30.0 to 34.9 percent	327	248	10.1%	7.6%	46.1
35.0 percent or more	2,085	312	64.6%	6.6%	9.1
Not computed	284	164	(X)	(X)	35.0

### From D3:

This profile combines data from multiple census tracts following Census Bureau methods for calculating estimates and margins of error. Estimates and margins of error displayed here are rounded.

The CV, or coefficient of variation, is a measure of reliability on a scale starting at zero, with lower numbers indicating higher reliability. If an estimate has a green CV (0 - 12), it has high reliability. A yellow CV (12.1 - 40) signals medium reliability. A red CV (40.1 - 100+) signals low reliability. Data with low reliability should be used with caution.

### From the Census Bureau:

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

### Notes:

·For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. (pdf format)

·The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see Review of Changes to the Measurement of Disability in the 2008 ACS.

·While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

·Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

# 2005-2009 American Community Survey

## Demographic Profile

Osborn, Skillman Good Neighborhood	Estimate	Margin of Error	Percent	Margin of Error	CV
------------------------------------	----------	-----------------	---------	-----------------	----

- 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
- 8. An '(X)' means that the estimate is not applicable or not available.
- 9. An 'NA' in the CV means means the CV is not applicable or calculable.
